

JOINT COMMITTEE ON AGRICULTURE, FOOD AND THE MARINE

The Role of Parliaments in Shaping the Future of Food and Farming, 22-23 November 2018

Proposal of Irish Delegation - Future Debates on CAP

Risk Management

Article 70 of the proposed Regulation provides for the establishment of risk management tools, which are primarily confined to insurance premiums or mutual funds that can be set up by farmers. The Committee is concerned that the proposed Regulation makes this mandatory on Member States and believes that while risk management measures, such as insurance, should be considered, their inclusion within the proposed Regulation should be re-evaluated.
